

Minor in Accounting

The Accounting Minor complements a wide range of majors by providing a technical understanding of financial reporting, regulatory compliance, and the use of accounting information in organizational decision-making. Students gain foundational knowledge in the preparation and interpretation of financial statements, as well as the application of accounting information in financial management.

The curriculum includes an introduction to federal tax compliance for individuals and major types of business entities. Students also complete additional upper-division coursework that allows for exploration of specialized topics such as budgeting, project management, information systems, auditing, or advanced areas of financial reporting and taxation.

This minor prepares students to better understand the financial operations of organizations across all sectors, public, private, and nonprofit, and enhances their ability to contribute effectively in any professional role.

Code	Title	Semester Hours
Requirements for minor: ¹		
AC 2301	Financial Accounting	3
AC 2302	Managerial Accounting	3
AC 3310	Intermediate Accounting I	3
AC 4301	²	3
Select six additional hours of upper-division accounting courses. ²		6
Total Semester Hours		18

¹ Non-business majors: The only prerequisite for all courses is the successful completion of any 1000-level math course.

² AC 4351 is a major requirement for Business and Law Majors; therefore, Business and Law majors would select nine additional nine hours of existing upper-division accounting courses for which they have completed the prerequisites and are not being used to satisfy Business and Law degree requirements.
