

B.S. in Engineering Management

Engineering Management

Successful engineering managers - in manufacturing, the military, or other industries - use powerful analytic metrics and methods to solve complex problems. The engineering management program at St. Mary's University provides an opportunity for future engineers and scientists to enhance their knowledge in the area of scientific management.

Graduates apply their skills in engineering management to solve problems; assess an engineering management study; and lead decision-making processes.

Unique facilities available to engineering management students include an electrical engineering laboratory accessible 24-hours a day; an energy conversion laboratory for motors, generators and transformers; a manufacturing and robotics laboratory; and a research laboratory equipped with both UNIX and Windows workstations.
